ACADEMIC EXPERIENCE

Zagazig university   Sep 2011 - May 2015   Egypt

Bachelor degree in Mechanical Engineering

I have the passion for software engineering so I decided to shift my career out to programming especially web development. Being passion with a career is awesome and push you towards perfection and creativity.

SUMMARY

Being passion with your career push you to give work maximum effort and add value all time. Working with ZUFS team to design and manufacture a formula car in Tuning team which designed a control system for the car and we managed to get the 4th place in London formula student competition also I have led a team of volunteering engineers to make improvement projects, solve problems and develop solutions for some Egyptian factories, those activities gave me the advantage to quickly adapt with my mates and fulfill work perfectly and efficiently.
